

James Light is a Florida Certified Building Contractor, entrepreneur, and owner of Precision Building & Renovating, LLC, a Tallahassee-based construction company he has operated since 2007. A proud Tallahassee State College alumnus and TSC Hall of Fame inductee, James has been researching and advancing 3D concrete printing technologies since 2016 and led the construction of Florida's first 3D-printed home in 2021.

Through his work, James has collaborated with industry pioneers, manufacturers, and innovators from around the world, gaining firsthand experience in bringing emerging construction technologies into real-world applications. He is passionate about the future of the built environment and the role that automation, advanced manufacturing, and skilled trades will play in creating safer, more efficient, and more resilient communities.
