Public Outreach Committee)
Orange County Children's Safety Center (Board Member)
High Ridge Civic Association (past President)
Site Plan Review Board, City of Altamonte Springs
Community and Youth Services Board, City of Orlando
Good News Jail & Prison Ministry - volunteer

BACKGROUND AND EXPERIENCE

With over 38 years of experience in the architectural profession, I have been involved in various capacities on a very wide variety of projects in both the public and private sectors. My understanding of the need for quality and well managed talent have brought project after project to a successful conclusion, resulting in frequent repeat clients. In short, I know how the system works, and I recognize what must be done to make it work to full effectiveness. I am very familiar with various construction delivery systems including design/bid/build, design-build, and construction manager at risk. My project experience includes examples of all three of these methods.

Complete listings of past project experience are available in the following categories:

Aviation	Food Service	Leisure & Hospitality
Commercial/Industrial	Forensic Services	Recreational
Educational	Governmental	Space/Master Planning
Financial Institutions	Health Care	Religious Projects

And of course, references and complete employment history are available upon request.

LEED and SUSTAINABILITY

I have long been aware of and committed to the concepts of sustainability and energy efficient design, and to that end, I became a LEED Accredited Professional in September, 2006. As such, I am able to provide single point responsibility in guiding a project through the five steps of LEED certification: (1) project registration, (2) integration and documentation of sustainable strategies in the design of the project, (3) using printed and on-line resources throughout design and construction, (4) submission of documentation for project certification at or near building occupancy, and (5) certification of the project by the U.S.Green Building Council. I am familiar with the interactive USGBC on-line documentation process, as well as the Credit Interpretation Ruling procedure.

PERSONAL TRAITS

I have strong leadership and organizational skills, and I am very much committed to quality in both my work and in the work of those whom I supervise. I take the practice of architecture seriously, yet I recognize that it must be fun to produce and a joy to behold and experience. I believe in the team approach to problem solving, and that everyone's input is valuable, including client, consultant, code official, and constructor. I am comfortable making presentations to groups, and I enjoy being part of a marketing team. I use Microsoft Word, Excel and AutoCAD on a daily basis, and provide my own administrative support frequently. My sketching skills are notable, and I am in excellent health. Outside interests include boating and fishing, acoustical music, travel, the outdoors, and spending time with family.
