What remarkable project you would refer to as a precedent for your students that has positively impacted their learning process?

I loved working for RJR Nabisco. As the facility designer, we designed the layouts for all floors, coordinated with the installation team to install new furnishings, reconfigured where needed, collaborated with the IT team, shopped for artwork, antiques, along with scouring the country for lush hand towels for every restroom. It was a totally unique experience as a facility designer where you had to be hands on every day for whatever demands, changes or challenges greeted you. I also met many other associates when I joined IFMA.
