

Karla Saldana Ochoa is a Tenured Track Assistant Professor in the School of Architecture at the University of Florida, and a faculty affiliate at the Center of Latin American Studies and [FIBER](#), the Florida Institute of Built Environment Resilience at the University of Florida. Her teaching and research investigate the interplay of Artificial and Human Intelligence to empower creativity and social good. Karla leads the [SHARE Lab](#), a research group focused on developing human-centered AI projects on design practices. Karla is an Ecuadorian architect with a Master of Advanced Studies in Landscape Architecture and a Ph.D. in Technology in Architecture from ETH Zurich. Her Ph.D. investigated the integration of Artificial and Human Intelligence to have a precise and agile response to natural disasters.
